March 2019

Bravada Gold Corporation is a premier Nevada-focused exploration and development company, exploring for precious metals in well-established gold trends in one of the world's best gold jurisdictions. The company has a large portfolio of high-quality properties covering a range of development stages from early-stage exploration to advanced-stage exploration and pre-development, with four being funded by partners during 2019. **Partners** have typically spent ~\$1MM each year advancing Bravada's properties.

BVA has 11 Exploration & Development Properties in Nevada ~9,200 hectares

NEVADA FACTS

- Produces approximately 5MM ounces of gold per year, roughly 7% of the world total, approximately a quarter from underground mines
- Proven + probable gold reserves are stable, approximately 75MM ounces, replacing production nearly every year
- Production over 200MM oz Au
- 67% of Nevada is federal government land open to exploration
- Stable environmental regulations, economy and mining infrastructure
- Consistently ranked within the top 10 gold jurisdictions in the world to explore and mine by the Canadian Fraser Institute

Wind Mountain project

- 100% owned, gold & silver open pit/heap leach.
- NI 43-101 resource estimate & positive PEA in 2012.
- Assays from two holes drilled 1.5km apart in 2017/2018 indicate a High-grade "Feeder" exploration target exists between the two holes. As well, recent 3D modeling of magnetic data and surface geochemistry data support the target.

Quito

- High-grade gold, underground potential, similar geology to nearby Northumberland deposit.
- Past-producing open-pit mine: 174,460 Oz Au @ ~6g/t Au production.
- High-grade targets identified with four new sites permitted for 2019 drilling, subject to posting a reclamation bond.

Baxter

- 100% owned with similar geology to nearby Bruner district.
- Previous partner, Kinross discovered shallow oxide gold mineralization at the Sinter target (**32m of 0.88g/t Au intercept** starting ~30m vertically from surface). Indications are this zone extends to the west and remains open.

Highland

- OceanaGold recently signed a US\$10M earn-in J/V option.

Other Project Agreements

- **Nevada Zinc** has the option to acquire 100% of BVA's **South Lone Mountain** zinc/gold/silver project for cash, shares, and a retained royalty. BVA's claims partially surround the Lone Mtn oxide zinc deposit, which Nevada Zinc continues to expand beneath gravel cover with drilling.
- **Nevada Zinc** has the option to acquire 50% of BVA's gravel-covered **North Lone Mountain** zinc/gold/silver project for \$150,000 in work expenditures administered by Bravada. The property has a similar geologic setting as Nevada Zinc's expanding Lone Mtn oxide zinc deposit located 7km to the SE.
- **Baker Hughes Oilfield Operations, Inc.** is permitting a mine to extract barite at BVA's **Shoshone Pediment** project. Bravada will be entitled to a \$1/ton royalty from barite production after 150,000 tons have been extracted.
- **Group Ten Metals Inc.** has exercised the option to acquire 100% of BVA's **Drayton** Archean gold project (Ontario) for shares with Bravada retaining a royalty interest.

Several other projects are available for JV

Directors and Management

Lawrence Page, Q.C., Chairman & Director
Joseph A. Kizis, Jr., President & Director
Donald Head, Director
Nigel Bunting, Director
Ross McDonald, Director
John R. Kerr, Director
Michael Rowley, Director
Graham Thatcher, CFO
