February 2021

Bravada Gold Corporation is a premier Nevada-focused exploration and development company, exploring for precious metals in well-established gold trends in one of the world's best gold jurisdictions. The company has a large portfolio of high-quality properties covering a range of development stages from early-stage exploration to advanced-stage exploration and pre-development, with three being funded by partners during 2020. **Partners** have typically spent ~\$1MM each year advancing Bravada's properties.

BVA has 10 Exploration & Development Properties in Nevada ~6,500 hectares

NEVADA FACTS

- Produces approximately 5.5MM ounces of gold per year, roughly 7% of the world total, approximately a quarter from underground mines
- Proven + probable gold reserves are stable, approximately 75MM ounces, - replacing production nearly every year
- Production over 200MM oz Au
- 67% of Nevada is federal government land open to exploration
- Stable environmental regulations, economy and mining infrastructure
- Consistently ranked within the top 10 gold jurisdictions in the world to explore and mine by the Canadian Fraser Institute

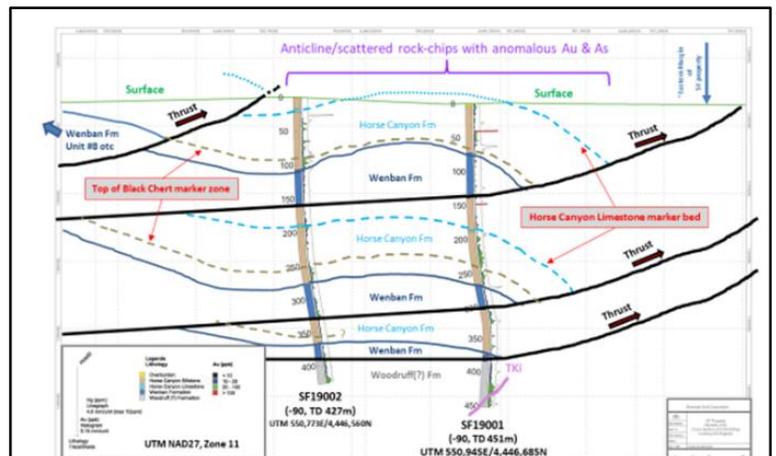

Wind Mountain project

- 100% owned, low-sulfidation gold & silver open-pit/heap leach.
- NI 43-101 resource estimate & positive PEA in 2012.
- Assays pending from 4 R.C. holes drilled in December 2020 as an initial test of the "Feeder" target.

SF project

- Nearby to some of the largest Carlin-type gold deposits discovered in Nevada in recent decades (ex. Goldrush ~6km to the west).
- Same important host rock, Wenban Fm, exposed on property.
- Two recent RC holes confirmed favorable geologic setting and thick zones of anomalous gold & related metals.
- Acquired adjacent HC claims.
- Soil sampling to refine targets in 2021.
- Potential JV opportunity.

Baxter project

- 100% owned with similar low-sulfidation gold & silver geology to nearby Bruner district.
- Previous partner, Kinross discovered shallow oxide gold mineralization at the Sinter target (**32m of 0.88g/t Au intercept** starting ~30m vertically from surface). Indications are this zone extends to the west and remains open.

Highland project

- **Recently returned 100% to Bravada**, after former partner completed 35km of CSAMT geophysics, collected & assaying 1,400 soil samples, completed limited detailed mapping, and drilled two partially completed core holes. Completion of 2020 core hole # 2 and additional holes are planned for 2021 using a reverse-circulation drill rig.

Other Project Agreements

- **Nevada Zinc** has the option to acquire 100% of BVA's **South Lone Mountain** zinc/gold/silver project for cash, shares, and a retained royalty. BVA's claims partially surround the Lone Mtn oxide zinc deposit, which Nevada Zinc continues to expand beneath gravel cover with drilling.
- **Baker Hughes Oilfield Operations, Inc.** is permitting a mine to extract barite at BVA's **Shoshone Pediment** project. Bravada will be entitled to a \$1/ton royalty from barite production after 150,000 tons have been extracted.
- **Group Ten Metals Inc.** acquired 100% of BVA's **Drayton** Archean gold project (Ontario) from Bravada for shares and a retained a royalty interest.

Several other projects are available for JV

Directors and Management

Lawrence Page, Q.C., Chairman & Director
Joseph A. Kizis, Jr., President & Director
Donald Head, Director
Nigel Bunting, Director
Ross McDonald, Director
John R. Kerr, Director
Michael Rowley, Director
Graham Thatcher, CFO
