October 2022

Bravada Gold Corporation is a premier Nevada-focused exploration and development company, exploring for precious metals in well-established gold trends in one of the world's best gold jurisdictions. The company has a large portfolio of high-quality properties covering a range of development stages from early-stage exploration to advanced-stage exploration to pre-development de-risking. Two projects were funded by partners during 2021, and partners have typically spent ~\$1MM each year advancing Bravada's properties.

BVA is De-risking the Wind Mtn Property for Production, One of 10 Exploration & Development Properties in Nevada

NEVADA FACTS

- Produces approximately >5MM ounces of gold per year, roughly 7% of the world total, approximately a quarter from underground mines
- Proven + probable gold reserves are stable, approximately 75MM ounces, - replacing production nearly every year
- Production over 200MM oz Au
- 67% of Nevada is federal government land open to exploration
- Stable environmental regulations, economy and mining infrastructure
- Consistently ranked within the top 10 gold jurisdictions in the world to explore and mine by the Canadian Fraser Institute

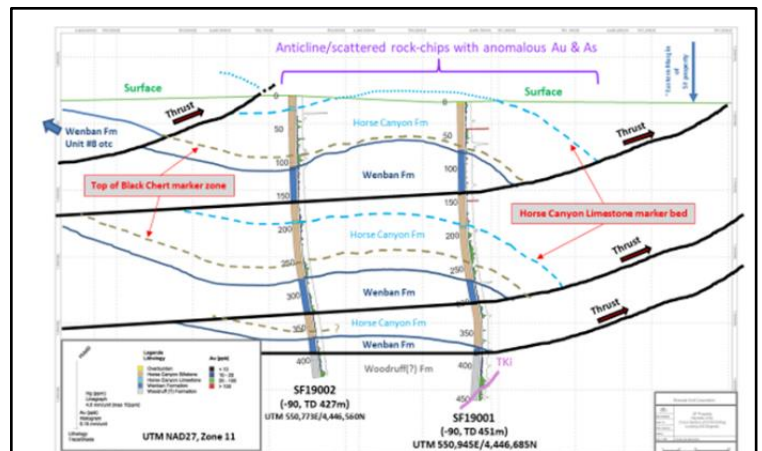

Wind Mountain project

- 100% owned, low-sulfidation gold & silver open-pit/heap leach.
- NI 43-101 resource estimate & positive PEA in 2012, *update underway to resource & PEA Q3 2022.*

SF project

- Close to some of the largest Carlin-type gold deposits recently discovered in Nevada (ex. Goldrush/Red Hill ~6km to the west).
- Same important host rock, Wenban Fm.
- Two 2019 RC holes confirmed favorable geologic setting and thick zones of anomalous gold & related metals.
- Acquired adjacent HC claims.
- Soil sampling to refine targets planned.
- Potential JV opportunity.

Baxter project

- 100% owned with similar low-sulfidation gold & silver geology to nearby Bruner district.
- Previous partner, Kinross discovered shallow oxide gold mineralization at the Sinter target (32m of 0.88g/t Au intercept starting ~30m vertically from surface). Indications are this zone extends to the west and remains open.
- Planned soil survey to refine drill targets west of the Sinter mineralization.

Highland project

- **Headwater Gold** returned the property after drilling 7 R.C. holes with moderately encouraging results. Many low-sulfidation targets with high-grade gold/silver mineralization have been identified for drill testing.

Other Project Agreements

- **Baker Hughes Oilfield Operations, Inc.** recently sold to **I-80 Gold** its interest in a partially permitted barite mining operation at BVA's **Shoshone Pediment** project. Bravada will be entitled to a \$1/ton royalty from barite production after 150,000 tons have been extracted. BVA retains other mineral rights for the property.
- **Stillwater Critical Minerals Corp. (previously Group Ten Metals, Inc.)** acquired 100% of BVA's **Drayton** Archean gold project (Ontario) from Bravada for shares and a retained a royalty interest. **Heritage Mining Ltd.** Acquired an option from Stillwater to earn 90% interest in the project in November 2021.

Several other projects are available for JV

Directors and Management

Lawrence Page, K.C., Chairman & Director
Joseph A. Kizis, Jr., President & Director
Nigel Bunting, Director
Ross McDonald, Director
John R. Kerr, Director
Michael Rowley, Director
Graham Thatcher, CFO
